Portfolio

ABOUT ME

Full-Stack Software Engineer with 2+ years of experience building enterprise web applications in Korea and Cambodia. Specialise in Java/Spring Boot backends paired with modern frontends (Next.js, TypeScript). Proven track record in FinTech and B2B platforms — from database design and REST API implementation to frontend delivery. Comfortable working in Korean-language enterprise teams and delivering clean, maintainable code.

PROFESSIONAL EXPERIENCE

Bizplay

OCTOBER 2025 — PRESENT

Full-Stack Developer• Seoul, South Korea

Develop frontend pages with HTML/CSS and JavaScript (jQuery) for government-facing financial systems

Build backend services and SQL queries with Java, MyBatis, and Oracle database
